

## **The Role: Full Stack React Native Developer**

### **Our Mission:**

Learn what its like to work at a start-up! Divebox is a local resale marketplace making it easier than ever to buy & sell secondhand. Our team is looking for a passionate software mobile developer to have an early impact on the company as we grow! You'll report directly to the Chief Technology Officer and play an integral role in shaping the future of the product on iOS and Android. You'll gain significant experience in front-end and back-end development, project management, and support our supply and demand growth efforts.

### **Requirements:**

- You have sound judgement, keen eye for details and tenacity for solving difficult problems.
- Strong analytical skills and use of data for sound decision-making.
- You bring a positive energy to the team and thrive on strong collaboration.
- You strive for constant improvement in both yourself and your team in meaningful ways.
- You are someone others look to for solving difficult problems, bounce ideas off and providing an alternate viewpoint.
- Technologies that we use or will be using: Java, JavaScript, Python, Node.JS React Native, React, Angular, responsive web design Firebase and other cloud Platforms Agile Engineering CI/CD practices and tools like github, Jenkins

### **Responsibilities:**

- Implementation of software features based on written and visual/design specifications.
- Quality assurance testing of software contributions.
- Testing may be performed manually or may take place in the form of automated unit testing.
- Development of software patches or fixes for known bugs or malfunctions i.e. respond to bug reports.
- Use of organizational and digital communication software to effectively contribute to assigned task works.
- Developing front end architecture.
- Developing back-end applications.
- Creating servers and databases for functionality.
- Ensuring cross-platform optimization for mobile phones.
- Ensuring responsiveness of applications.
- Seeing through a project from conception to finished product.
- Meeting both technical and consumer needs. Staying well-informed of developments in web applications and programming languages.

Part-time Immediate or 4-month Summer Period Starting May 2021.
